PROFESSIONAL SUMMARY

Experienced communication systems specialist with strong background in operating and maintaining multichannel transmission systems. Adept at troubleshooting, signal operations, and managing complex networks, ensuring seamless communication under various conditions. Strong focus on team collaboration and achieving results, with flexibility to adapt to changing needs. Reliable and skilled in technical and operational tasks, with keen ability to enhance system efficiency.

SKILLS

- Tactical Communications & Signal Support
- Network Troubleshooting
- Help Desk & User Support
- Radio Communications
- Field Equipment Setup & Maintenance
- Cable Management & Documentation
- Preventive Maintenance Checks
- Deployment & Exercise Support
- Problem Solving Under Pressure
- Customer Service
- Network configuration
- Wireless networking

EDUCATION

Illinois Valley Central Highschool
Chillicothe, IL • 05/2020

High School Diploma

Signal School
Fort Gordon, • 12/2020

**Multichannel Transmission System
Operator-Maintain**

WORK HISTORY

Army National Guard - Network Communications Specialist / Signal Support

Raleigh, NC • 05/2026 - Current

- Operated multichannel transmission systems to ensure reliable communication across diverse platforms.
- Maintained and repaired equipment, enhancing operational readiness and minimizing downtime.
- Collaborated with cross-functional teams to streamline communication processes and improve efficiency.
- Promoted safety practices by following established guidelines when working with high-voltage electrical components in various work environments.
- Enhanced communication capabilities by installing, operating, and maintaining multichannel transmission systems.

U.S. Army Signal Corps - Network Communications Specialist / Signal Support Soldier

06/2020 - Current

- Supported tactical network and communications systems during garrison operations, field exercises, and deployed missions across the United States, South Korea, Germany, and the Middle East.
- Configured, operated, and maintained signal equipment used to keep teams connected in field environments, including satellite transport and radio-based communications support.
- Reconditioned a new Satellite Transport Terminal during a field exercise, helping restore and improve mission communications capability under field conditions.

EDUCATION & CERTIFICATIONS

- Licensed [Multichannel Transmission Systems Operator-Maintainer / 25H Network Communication Systems Specialist] - [2020-Present]
- [CompTIA] Training - [In progress]

- Troubleshoot network, hardware, and communications issues for soldiers and leaders, translating technical problems into clear next steps for non-technical users.
- Performed preventive maintenance, cable checks, equipment accountability, and setup/teardown for communications packages during repeated field exercises.
- Worked within small teams and larger command structures, balancing technical tasks, time-sensitive requests, and mission requirements with limited resources.

U.S. Army Active Duty - 25Q Multichannel Transmission Systems Operator-Maintainer / 25H Network Communication Systems Specialist

06/2020 - 05/2026

- Operated and supported Army communications systems with emphasis on reliability, documentation, troubleshooting, and rapid field maintenance.
- Maintained accountability and readiness of communications equipment while supporting daily operations, inspections, and exercise preparation.
- Assisted with user support, basic network checks, equipment staging, and communications planning for operational teams.
- Conducted troubleshooting and maintenance on communication equipment to enhance operational readiness.
- Collaborated with team members to optimize system performance and streamline communication processes.
- Trained junior operators on equipment functionality and standard operating procedures for effective workflow.
